

Verification Statement

First Environment, Inc. (First Environment), a New Jersey Corporation headquartered at 10 Park Place, Building 1A, Suite 504 Butler, NJ 07405 USA provides this verification statement to A-Gas US Inc. and the American Carbon Registry (ACR) as a deliverable of the verification process for the following Project: ("the Project")

| Project Name | ACR Project ID | Reporting Period |
|--------------|----------------|-----------------------|
| A-Gas V8 | ACR773 | 1/6/2021 – 12/31/2021 |

This verification covers the above referenced reporting period for the Project and was conducted against the American Carbon Registry Standard, Version 7.0, December 2020 (ACR Standard) and the ACR-approved methodology 'Methodology for the Quantification, Monitoring, Reporting and Verification of the Greenhouse Gas Emissions Reductions and Removals from Certified Reclaimed HFC Refrigerants, Propellants, and Fire Suppressants, Version 2.0 (the Methodology).

The objective of verification activities is to assure the Project's conformance with the verification criteria and that the requirements of the ACR Validation and Verification Standard, Chapter 8.B are met. First Environment's role as the verifier is to provide an independent, third-party assessment of the Project's conformance with the verification criteria. First Environment was retained to provide verification services for the Project's GHG emission reductions assertion based on the following scope:

- *Boundaries of the assertion:* A-Gas reclamation facility in Rhome, TX;
- *The physical infrastructure, facilities, and activities within the assertion:* Refrigerant reclamation equipment; and
- *GHG sources, sinks, and reservoirs included within the assertion:* Baseline emissions from the use of virgin HFCs in refrigeration or air conditioning equipment.

Based on the assessments performed and the historical evidence collected, First Environment concludes that the Project's GHG emissions reductions, due to the reclamation and resale of HFCs for the period from January 6, 2021 to December 31, 2021 can be considered with a reasonable level of assurance:

- consistent with the GHG Project Plan,
- in conformance with the ACR Standard and the Methodology, and
- without material discrepancy.

Verified results show:

| Reporting Period: January 6, 2021 through December 31, 2021 | Total |
|---|-----------|
| Baseline Emissions (m.t.CO ₂ e) | 1,368,452 |
| Project Emissions (m.t.CO ₂ e) | N/A |
| Emissions Reductions (m.t.CO ₂ e)* | 1,368,452 |

*As measured and calculated in accordance with the Project Methodology
